DEMIRE places Euro 600m benchmark bond at a low coupon of 1.875% and a 5-year maturity – financing expenses and FFO result to benefit significantly – cost of debt now below 2.0%

On Monday evening, 30 September, DEMIRE announced the successful placement of the benchmark corporate bond, on which we reported last week on 24 September. The conditions and the issued volume even exceeded our expectations. The company managed to place the unsecured fixed rate senior note with a volume of Euro 600m and a 5-year maturity. The coupon is at a low rate of only 1.875% (we expected a rate between 2.0% and 2.3%) and the order book was significantly oversubscribed.

As expected, the proceeds will be used to refinance the outstanding notes due 2022 with an outstanding volume of about Euro 367m at a coupon of 2.875%, as well as the outstanding Euro 142m promissory notes loan also due in 2022 with a high coupon of 4.0%. Thus, the firm followed up on its strategic goal and managed to significantly improve the financing and maturity profile and to reduce the cost of debt by about 90 bps to below 2.0%. This should translate into a positive effect of about Euro 5m annually on the firm's FFO. The remaining about Euro 90m of the proceeds will be used for general corporate purposes and we expect further significant deals to come in the next months.

The placement of the benchmark bond at very attractive conditions as well as the refinancing of the higher cost debt is a very good step. We also see the other strategic goals in terms of acquisitions, asset-management and the optimization of processes on track and expect further results to become visible till year-end. As mentioned, given the fresh capital, we expect further significant deals on the acquisition side in the coming months. We clearly confirm our Euro 5.90 target price and maintain our Buy rating for the share.

DEMIRE Deutsche Mittelstand Real Estate AG

Industry:	Real Estate
Sub-segment:	Office / Retail / Logistics
Region:	Germany
Headquarter:	Frankfurt am Main
Foundation	2006
Employees: (31.12.2018)	75

IR Contact:

Michael Tegeder, Head of IR and Corporate Finance

Management Board of DEMIRE AG:

CEO Ingo Hartlief (FRICS)
CFO Tim Brückner

Supervisory Board of DEMIRE AG:

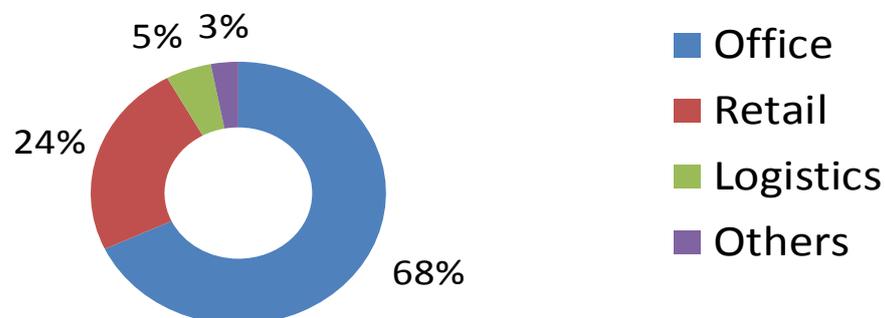

Prof. Dr. Alexander Goepfert (Chairman)
Frank Hölzle (Vice Chairman)
Prof. Dr. Kerstin Hennig

DEMIRE Deutsche Mittelstand Real Estate AG acquires and manages high quality commercial real estate properties. The firm was originally founded in April 2006 as MAGNAT Real Estate Opportunities, focusing their business activities on real estate markets in Eastern Europe and the Black Sea region. In 2013 however, the company changed their strategic alignment and further changed their name to DEMIRE Deutsche Mittelstand Real Estate AG. Since then, the focus has been shifted on office, retail and logistics properties in secondary locations across Germany, such as mid-sized cities and bordering areas to metropolitan cities. The company follows a strategy that combines a stable income creating Core+ portfolio with value-add properties to create rental growth opportunities due to a "manage-to-core" strategy, and redevelopments due to extensions, refurbishments and selective developments.

The company currently holds a diversified portfolio with a total rental space of almost 1,100,000 sqm and a portfolio value of close to Euro 1.4bn as of 1H 2019. The portfolio is diversified within the commercial segment. Currently, about 68% of the portfolio in terms of Gross Asset Value is concentrated in offices, 24% in retail properties, 5% in the logistics segment and about 3% in others. The largest share of the portfolio is located in the state of North Rhine-Westphalia, where more than 23% of the portfolio is held. So far in 2019 about Euro 0.3bn of new acquisitions were closed. For the rest of the year we expect further additions to the portfolio and some minor disposals as currently Euro 12m of properties are held for sale.

The average maturity of rental contracts amounts to c. 4.8 years with a vacancy rate of 11.1% as of 1H 2019. Among tenants are various well-known and successful brands like Telekom, Sparkasse, Comdirect Bank, and Zapf. Except the 27.3% share of GMG (Telekom), the remaining tenants from the top 10 list make up for not more than 3% each. This represents a well diversified income structure. Average gross rental yield is at 6.2%. Office properties have a yield of 6.1% as compared to retail at 6.5% and logistics at 6.4%.

Asset Class as % of portfolio market value as of 1H 2019

Since 15 July 2016, DEMIRE is trading in the Prime Standard segment in Frankfurt. That segment requires the highest level of transparency of all segments at the Frankfurt Stock Exchange and even in Europe.

SWOT Analysis

Strengths

- The Management is highly senior, experienced and well-known in the German real estate sector.
- The transformation of the company has well proceeded since the change in strategy in 2013 and now has a clear focus and targets for the coming years.
- The current portfolio is well diversified between asset classes and regions and therefore has no cluster risks in that regard.

Weaknesses

- The firm's current free float of the share is at about 11% very low, which limits the tradability and liquidity of the share. The free float should be increased with possible upcoming capital hikes, however.
- DEMIRE still lacks reputation in the market, which leads to a discount in their share price. As the firm gains more popularity and awareness with investors we see this current weakness turning into an opportunity to close the current gap to NAV.

Opportunities

- DEMIRE currently follows the strategic plan "REALize Potential". Thereby the company aims lift the size of the portfolio to more than Euro 2bn, realize potential through asset management, reduce their financing costs and make use of economies of scales in the portfolio. The strategic plan sounds very promising and, if accomplished, could lead to lucrative earnings in the midterm future. DEMIRE is on a very good way to deliver on the goals. Two big portfolio deals were recently closed in 2019 and the financing costs and profile was significantly improved following the placement of the benchmark corporate bond in September.
- DEMIRE could reach better financing conditions as they reach a better standing and they grow their portfolio and strengthen their balance sheet. The firm has already significantly lowered its cost of debt to currently 2.8%. After the placement of the new corporate bond and the respective refinancing activities the cost of debt decrease to below 2.0%.
- The firm still has a lot of upside potential in their current portfolio due to revaluation gains. There are many objects that are still significantly below the potential value. The company can help realize that potential by improving their portfolio e.g. by reducing vacancy rates and other measures.
- The focus on secondary locations still offer lucrative yields compared to the Top7 locations and good opportunities to find lucrative deals with value add potential that will drive the company's operations and thus the share.

Threats

- The largest tenant in the portfolio, Deutsche Telekom, currently makes up for about 26% of gross rental income, which could lead to a significant reduction in rental income if problems were to arise. However, Deutsche Telekom is a large company with a long history and therefore a good tenant to have. Furthermore, the exposure is split over multiple different lease contracts and over many properties with long lease maturities and a high WALT.
- The company follows a "manage-to-core" strategy in their Value-Add portfolio and further has some redevelopment objects in their portfolio. Problems regarding the improvements of the objects could lead to higher than expected costs.
- A change in European monetary policy by the ECB regarding the termination of the currently all-time low-interest period could result in a relatively high increase of interest expenses and might also lead to higher expenses for DEMIRE. We currently do not see any drastic changes in the near future however and the company has also already locked in some long term financing at good rates. And keep in mind that new portfolio additions might probably come in the portfolio with lower Cost of Debt as the current group level, bringing down the group's Cost of Debt position.
