Sound 9M show +4% in rental income and +5% in FFO, good progress at streamlining the portfolio and concentrating on selective developments, mainly in Berlin, rating upgrade to Buy

Last week, on 27 November, CA Immo published the 9M report. The result underlined the superior asset quality and the resilience of business model in a challenging economy, with Germany being in the second recession year. **The rental income was up 4%, from Euro 172.7m to Euro 179.1m. Several sales activities of selling non-core assets (Euro-6.5m y-o-y) were clearly overcompensated by important development completions (Euro 12.2m y-o-y) and rental income increases by indexations (Euro 0.7m yoy) in the investment portfolio. The FFO I cash result even climbed 5%, from Euro 82.7m to Euro 86.5m and the full year guidance of more than Euro 105m was confirmed with the 9M report. This target is just slightly below the Euro 113.8m from 2023.** The cash-driven EBITDA result was flattered last year by the result from some successful trading activities, clearly above book values. Thus, with just relatively smaller transactions this year so far, the EBITDA result halved from Euro 268m to Euro 131m. It is worth to mention, that the indirect expenses were down by about 6% from Euro 35m to Euro 33m due to lower personnel expenses. The company's EBIT was down from Euro 111m to Euro 22m but still in the black zone. Again, like in the year before, the general hike in yields for office markets and the dampened investment activity translated into a negative net revaluation result of Euro -119m, after Euro -156m in 9M 2023.

The superior asset quality allowed for 3 sale transactions in the first quarter and 8 more transactions in 3Q, as well as the sale of a 10% stake of Frankfurt Skyline Plaza shopping center. These numbers remarkably underline a successful capital rotation that still works in an unsafe economic and political framework. The asset quality was also underlined by a good letting performance again, which was at 121k sqm, clearly above the 92k sqm last year. It is worth to mention, that all signed rental contracts were about 5% above the expected rental value (ERV) and 40 rental contracts were signed with a start date in the coming months, that tackle about 28% of the current vacancy. These are good news for coming cash flow results and also underline the portfolio resilience in challenging times. At the letting performance 56% were prolongations and "only" 44% are new leasing contracts, whereas it was a 50% / 50% mix last year, showing that there is still a reluctance of potential new tenants to sign for longer new rental contracts. We are optimistic for future, as CA Immo did a lot to build up a resilient and very modern portfolio of superior office assets in some stable European metropolises and will selectively build on some new projects, like the Anna Lindh Haus in Berlin with a very low carbon footprint, where the groundbreaking was recently done in September. With three more superior office products to come in Berlin, like Upbeat for DKB Bank to be finished in 1Q 2026, the annual gross rental income will jump by about Euro 30m. We like the 9M and also like the fact that in 4Q five more non-core sales were done which will be closed until the end of the year, which allows further improving overall portfolio quality. The recent share buyback program which started 28 November to buy up to 1.9m own shares will also bolster the share price, which declined the last 2 months. Thus, we decided to upgrade our rating from Accumulate to Buy. Target price still at Euro 33.00.

CA Immobilien Anlagen AG

Industry: Real Estate
Sub-segment: Office/ Commercial
Country: Austria
Headquarter: Vienna
Foundation: 1990

Georg Edinger
Sebastian Obermair

Founded in 1987 CA Immo is one of the major property owners in Europe. The Vienna-based company is a specialist in property management and the development of premium large-scale office properties as well as mixed city quarters and had on year-end 2023 a gross asset value of approx. Euro 5.2bn allocated in Germany (66%, mainly Berlin, Frankfurt, Munich and Dusseldorf), Austria (7%, mainly Vienna) and CEE (27%, mainly Warsaw, Budapest and Prague). Serbia is almost fully sold now, in the course of the capital rotation program, the Hungary assets (approx. Euro 400m) might be fully or partly sold during 2024, as Hungary is no longer a core market since June 2023.

In the last years CA Immo further sharpened its specialist profile for superior, green and very modern office properties in top locations, especially by disposing some non-strategic assets like logistics assets or assets which do not belong to the core regions of activity or are aged and contain a higher capex demand for the future years. By doing this, CA Immo rebalanced the group's portfolio picture towards office and towards the more stable economies of Germany and Austria. CA Immo strives to bring the share of Germany and Austria to over 80%. In the course of capital rotation the company already exited the markets in Croatia in October 2020 with the sale of Zagrebtower, and Slovakia, in March 2021, with the sale of two office properties. The exit from Romania (an approx. Euro 400m portfolio with Euro 30m annual rent) was signed in November 2022 and most properties of Serbia followed in 2023, and the rest might follow in 2024. As Hungary is no longer a core market, these assets might also be sold quite soon, -de-risking CA Immo's overall portfolio, but also bringing down the short term FFO numbers. On the other hand, the 2024 P & L will profit from the full year contribution of recently completed Berlin Hochhaus am Europaplatz with an annual rent of about Euro 12m.

The company is strongly geared to a Net Zero vision, that means sustainable office space for the generations to come. CA Immo stands for a remarkable reduction of energy intensity in property operations by about 15% until 2025. Between 2019 and 2022 there was already a reduction of carbon emissions of about 18%. CA Immo is geared to steadily improve their ESG ratings and give highest priority in top level management to ESG criteria. The company improved the ISS ESG rating from C- in 2020 and 2021 to now C (Prime) in 2022 and also in 2023.

Another highlight of the last years was the significant reduction of the financing costs or at least keeping them stable at very low levels. The average cost of debt remarkably came down, from an initial 2.3% at year-end 2016 to 1.9% at year-end 2017 and to only 1.7% at year-end 2018. It remained on this very low level in 2019. In 2020 the cost of debt even declined to 1.5% and remained there in 2021. The 2002 cost of debt was only little higher at 1.71%. A big step of optimisation of the financing structure was completed by an inaugural Euro 500m Benchmark Bond issued in January 2020, with a 7 years duration and a coupon of only 0.875% (final yield 0.998%). That was in a retrospective view a very good timing. A second Euro 350m green bond also came in 2020 with a 5 years duration until October 2025 and a low 1.0% coupon. This both landmark issues helped a lot in challenging COVID-19 pandemic years and in the aftermath of strongly rising inflation and shaky economic times after the outbreak of the Russian aggression against Ukraine. The cost of debt of 2.02% for 2023 was also very moderate, given the new interest rate environment. After the repayment of the Euro 175m bond in Feb. 2024, there is no big maturity before the Euro 350m Green Bond in Oct. 2025.

Besides the quite comfortable debt maturity profile until October 2025 the rock solid balance with an equity ratio of almost 44% at year-end 2023 (47% in 2022), a net LTV of still very low 36.6% (after 32.5% in 2022) and liquid funds of still Euro 739m after the Euro 175m bond repayment in February 2024 are good arguments for the stock. CAI is listed on Vienna Stock Exchange since 1988 and member of ATX Blue Chip index and clearly bet the ATX performance in most previous years. The high RoE generation is an important argument, as it was +10% per year in average of the last five years (2017 - 2022). With a good 2023 FFO I result of approx. 114m clearly above the guided Euro 105m, the AGM on 2 May 2024 decided for a 80 Cents payment for each dividend on 13 May.

Euro 5.2bn property portfolio at the year-end 2023

(thereof Euro 4.8bn property assets let and
Euro 0.4bn at current development or trading properties)
